

Octavia Selim

Full Stack Software Engineer

Portland, OR | (323)646-5101 | oselim14@gmail.com | [GitHub](#) | [LinkedIn](#)

I am a software engineer with a background in Kinesiology, and health care. I have experience assisting a variety of people while maintaining adaptability and exceeding my goals. I excel in a fast paced and collaborative environment. I aim to constantly learn and improve.

SKILLS

- Programming Languages: HTML, CSS, JavaScript, Python
- Frameworks and Platforms: React, NodeJS, Django, jQuery, Express, MongoDB/Mongoose
- Other: RESTful API's, GitHub, Heroku, Bootstrap, Materialize, Application & Database Object-Oriented Design, Algorithms, Data Structures, Responsive Design

RELEVANT EXPERIENCE

Software Engineering Immersive | General Assembly | Remote | 09/13-12/09

Successfully completed 500+ hours of expert led instruction and hands-on learning in front and back end technologies and languages, fundamentals and the industry's most in demand technologies. Developed projects, including:

- [Mancala](#): Built an HTML 5 browser based game, with CSS for presentation and JavaScript for game logic. Mancala allows the user to play this classic game against a randomly generated computer. [GitHub](#)
- [Pocket Monsters](#): Built a full-stack application using NodeJS, Express and MongoDB, as well as a third party API to create a database that allows users to search for pokemon information and store the information in their individual account. [GitHub](#)
- [TravelNow](#): Built a full-stack application using Python, Django, AWS, Google Maps API, CSS and HTML. The website allows users to map locations they would like to visit in a given city, and share this information with friends. They have the ability to see other user's itineraries and leave comments.
